

Simplify Your Library's Performance with Our Cloud-based Solution

Efficient tracking and reporting of library transactions, programs, events, and gate count made easy!

Are you tired of manual data collection and analysis processes that drain your time and energy?

Introducing our cloud-based solution that simplifies the tracking and generates summary reports on all your library's critical data. Our software as a service (SaaS) platform offers an intuitive user interface, customizable reports, and real-time dashboards that enhance transparency, accountability, and productivity in your library operations.

With our SaaS solution, you can:

- Record and categorize reference transactions by type, patron, and more.
- Manage programs and events attendance, type, and impact assessment.
- Monitor typical week transactional data, including in-house circulation, reference, gate count and more.
- Track gate count to optimize staffing, facilities, and security.
- Generate summary reports and visualizations on key performance indicators for library directors and stakeholders.

Join us in exploring how our SaaS solution can streamline your library's performance and enhance your patrons' experience. Visit our booth #226 or attend our session in Room A11 at the Sacramento Convention Center at 4:00pm to learn more!
